

MS/HS Academic Coaching Center 2019- 2020 - Description

In the Academic Coaching Center, we believe that all students deserve a quality education and opportunity to reach their individual potential. We know that some students will need support and specialized instruction to reach academic goals. Therefore, the Academic Coaching Center works with teachers and parents to determine, based on school performance, whether or not students should be recommended for an external evaluation in order to receive Academic Coaching Center Services.

If an external professional determines that a student needs additional support, the student will enter into the Academic Coaching Center.

Using the information provided by the external professional, the Academic Coaching Center Specialists will work with students inside and outside of the mainstream classroom to reach academic goals established by the school and classroom teacher.

Academic Coaching Center Team

Many people work together to support the Academic Coaching Center, including: Academic Coaching Specialists, Counselors, classroom teachers, parents and external professionals.
